

INET

Innovation Network
Enzyme Technology

Supported by:

on the basis of a decision
by the German Bundestag

INET – creating future technologies – together.

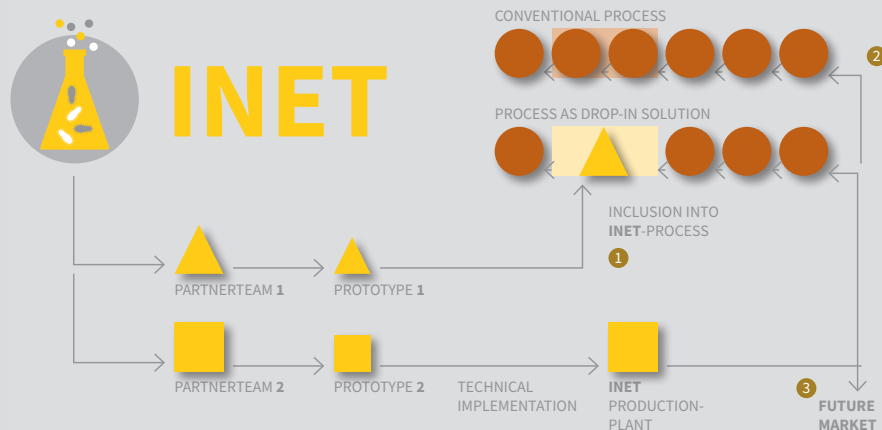

What is INET about?

The Innovation Network Enzyme Technology (**INET**) supports - on behalf of the Federal Ministry for Economic Affairs and Energy – food, chemical and recycling companies for the tailor-made implementation of innovative biotechnology solutions.

Currently the 15 medium-sized **INET** partners develop biotechnological process solutions in the fields of white (industrial), gray (environmental) and yellow (food production) biotechnology.

You are staff of an energy, food, chemical or recycling company and you are interested in customized & innovative biotechnology solutions?

- 1 **INET develops** bio- and enzyme technology based processes as drop-in solutions for your individual industrial processes
- 2 **INET provides** biotechnology based precursors and raw material to use in your conventional or biotechnology based process
- 3 **INET implements** new product lines based on or/and in close collaboration with your ideas

Your company is a supplier or developer of biotechnological processes and plants?

- > **INET links** different midsize single components to gain a technical composite solution
- > **INET leads** functional based labor communities to solve current environmental issues and development assignments
- > **INET enables** the joint approach of potential and new customer groups, reduces individual acquisition costs and compensates size-related disadvantages as an **INET** team
- > **INET offers** a joint external appearance approach as leading German innovation network, supported by the federal ministry of economics and is conducive to reach new investors and open up new sales markets
- > **INET increases** the chances to gain subsidies and development funds and reduces development risks through close cooperations with research partners and funding agencies

INET – develop future markets – together.
